

AKSHADA CHAUGULE

QA ENGINEER | Immediate Joiner

+91-7397890527 | akshadachaugule13@gmail.com | Navi Mumbai, India |

PROFESSIONAL SUMMARY

Detail-oriented QA Engineer with 2.8 years of experience in Manual Testing within the BFSI domain, specializing in Loan Management Systems. Experienced in requirement analysis, FSD preparation, Functional, Regression, Smoke, Sanity, System, UAT, API and Database Testing. Hands-on experience with Postman and SQL/Oracle for API and backend validation, defect tracking, and production issue troubleshooting. Basic hands-on knowledge of Selenium WebDriver, Java, TestNG, Maven and POM, with a strong focus on application stability, quality and efficient software delivery.

PROFESSIONAL EXPERIENCE

Puratech Solutions (India) Pvt. Ltd. | Junior Quality Assurance Engineer | Jan 2024 – Sep 2026

Project: Commodity-Based Finance (eCBF) | IndusInd Bank | BFSI | Loan Management System (LMS)

- Executed end-to-end testing of BFSI web applications, primarily covering Loan Management System (LMS) workflows.
- Analyzed business requirements and prepared test scenarios, detailed test cases, test data and expected results.
- Performed Functional, Regression, Smoke, Sanity, System and UAT Testing across multiple builds and releases.
- Validated key loan workflows including Loan Disbursement, Repayment, Mark-to-Market (M2M) and NPA processes.
- Conducted API Testing using Postman, validating requests, responses, status codes, response data and service integrations.
- Executed SQL/Oracle queries for backend validation and reconciled database records with application results.
- Performed positive, negative, boundary and business-rule validation to identify functional and data-related defects.
- Logged, tracked, retested and verified defects using Mantis, collaborating with developers and business teams for timely resolution.
- Participated in requirement analysis, UAT activities, defect discussions and release validation.
- Supported production issue troubleshooting through application logs and SQL-based data validation in an Agile/Scrum environment.

CORE SKILLS

- **Manual Testing:** Functional, Regression, Smoke, Sanity, System, UAT
- **API Testing:** Postman, REST API, Request/Response Validation, Status Codes
- **Database Testing:** SQL, Oracle/MySQL, Query Execution, Data Validation
- **Defect Management:** Mantis, Defect Logging, Tracking, Retesting & Verification
- **Methodologies:** SDLC, STLC, Agile/Scrum

EDUCATION

Bachelor of Engineering – Electronics & Communication Engineering | Modern College of Engineering, Pune | CGPA: 8.9/10

CERTIFICATIONS

- The Complete SQL/MySQL Masterclass (Udemy) – 2022
- Software Testing (Quastech) – 2023
